

Octopus

The business intelligence dashboard

Our gateway solution into data warehousing for just £20k

Octopus – the business intelligence dashboard - democratises data and transforms it into actionable intelligence, making it a powerful tool that will revolutionise business. Octopus is recommended for analysts, finance teams and operational staff, working in businesses of any size, who want to see trends in data, share business insights faster, fulfil compliance requirements and make more informed business decisions.

For £20k, business get:

Data merged from four different data sources, presented in three different dashboards, refreshing every hour.

Features:

- Five dashboards, tailored to organisational needs
- SQL and Custom API connections
- Constant data refresh
- Inclusive support
- Three months of Azure cloud consumption

Outcomes:

- Analyse data with greater speed, efficiency, and accuracy
- Cost effective and scalable solution
- Interactive reporting of live metrics
- Connects multiple data sources into a single view
- Can be used by anyone in the business to make better, more informed decisions

Implementation

Before we start to build the business dashboards that are included as part of the Octopus solution, we'll go through a consulting process to help you decide which data streams and dashboards would be most useful to you and your business. This is driven by the outcomes and results the business is planning to achieve.

360° view of your business

Get deeper insights from your data

Drive tangible business outcomes

Eliminate repetitive reporting

Empower your team

Track live performance
