

# Guardian

All round security

## A winning combination of tools, services and strategy

Guardian - our cyber security gateway solution - simplifies security management to ensure maximum value and protection from threats.

TiG are industry leaders and have years of experience implementing security solutions that protect businesses from these threats. We have specific knowledge of the high-level requirements of those in the financial services, asset management, and professional services sectors. We will partner with you to become your security guardian, providing constant surveillance and protection, around the clock.

## Guardian uses market-leading Microsoft products including:

- Microsoft Defender
- Azure Threat Protection
- Intune
- Azure AD Premium
- Azure Information Protection
- Enterprise Mobility and Security
- Sentinel
