

# Cloud Pleaser

Move to the cloud with confidence

## Painless Azure Migration for just £20k

Managing security and meeting compliance requirements is actually easier in the cloud. Applications are more secure and costs are managed on a per user per month basis which makes forecasting, planning and scaling easier.

TIG have introduced an Azure 360 - Deep Discovery Report that allows you to migrate seamlessly. Right from the first step, we will take a detailed dive into your organisation and review your readiness to move to Azure. Any migration can be expensive and timely, but TIG will help eliminate disruptions and issues.

The output is a comprehensive report, with detailed node reporting, project costs and tailored advice, helping you plan the move to the cloud, with confidence.

### Cloud Pleaser will:

- ✓ Save you time on guess work
- ✓ Help you map out dependencies and readiness for each server
- ✓ Help you organise your time, budget and resource to the project
- ✓ Scan your physical and virtual servers
- ✓ Identifies additional configurations and design changes
- ✓ Calculate the cost to move serves and workloads

### 360 for Azure

- Scan your customers' physical and virtual servers
- See detailed node reporting and projected cost in Azure
- Discover dependencies and the cloud readiness for each server

### Database Migration

- Assess On-Premises SQL Databases
- Identify Opportunities from End-of-Life Versions
- Migrate to Azure SQL -No Training Needed

### Cloud Storage Migration

- Migrate to Azure Blob Storage
- Move Large Volumes of Unstructured Data Easily
- Relax while Your Migration Completes
